SC-P7500 Series

Quick Guide

This manual provides an overview of important operating procedures for this printer. See the User's Guide (online manual) for detailed instructions on using the printer.
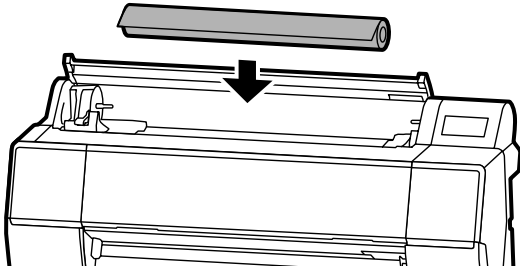

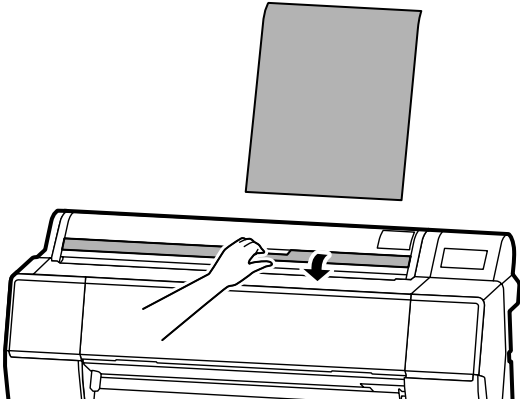

Getting Ready to Print

These pages explain how to get the printer ready for printing. Carefully follow these steps to get optimum print quality.

Check the Paper Loading Positions

Roll Paper
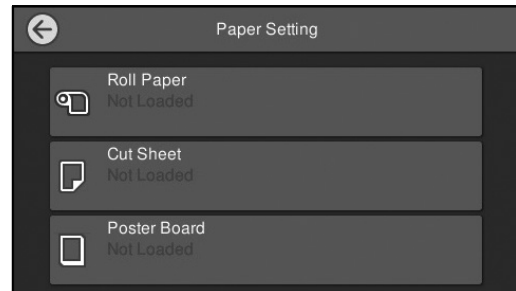

Cut Sheet / Poster Board (1 sheet)
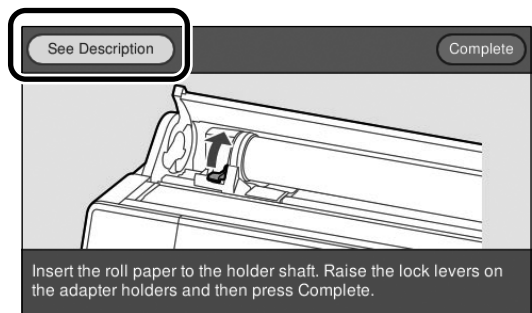

Load the Paper Following the On-Screen Instructions

1 Touch Paper Setting.

```
Menu        ✂        🔆        🗂        🛠        ℹ

⊘ Ready.

🗐        ---

GY  VM  OR  BK  VLM  LGY  LC  Y  GR  MB  V  C  🖋
```

2 Select one of the paper sources.

```
←        Paper Setting

🗐    Roll Paper
      Not Loaded

📄    Cut Sheet
      Not Loaded

📄    Poster Board
      Not Loaded
```

3 Touch **See Description** to see detailed on-screen instructions.

```
See Description                         Complete

Insert the roll paper to the holder shaft. Raise the lock levers on
the adapter holders and then press Complete.
```

Set the Paper Type and Paper Size

Print

The setting items vary according to the paper.
If you select a paper type or size that does not match the loaded paper, the printout will have creases, ink smudges, or banding.
You can also make advanced paper settings if necessary.

Press **OK** after you complete the settings

Paper Type

Roll Paper	OK
Paper Type	Premium Luster 260
Paper Remaining	Of
Advanced Paper Settings	

Amount of remaining paper or paper size

Photo Paper	
Premium Luster 260	
Premium Glossy 250	
Premium Semigloss 250	
Premium Semimatte 260	

Remaining Amount Management	
Remaining Amount Management	Off
Remaining Amount	30.0
Remaining Alert	5.0
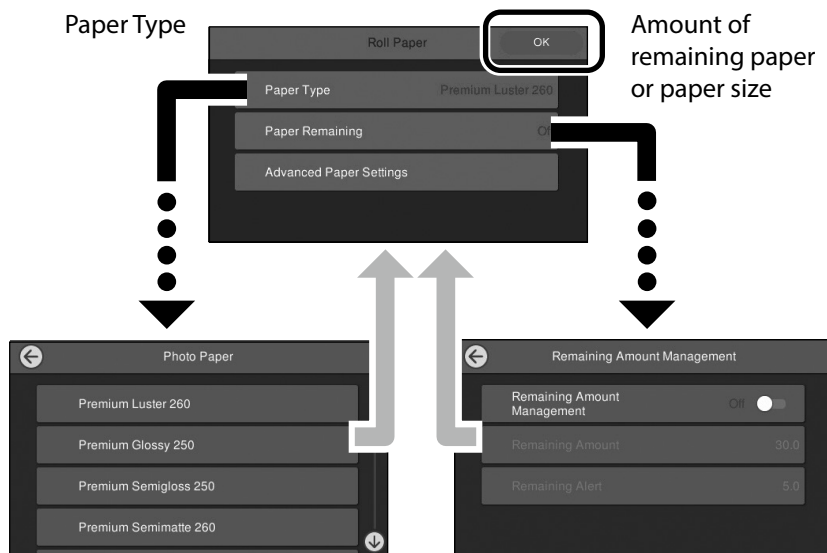

Paper will start being fed if the screen is not used for 90 seconds.

For Epson Special Paper, set the Paper Type according to the description on the packaging for the paper.
If the media setting you want to use for printing is not available in the printer driver or on the control panel, see the following page to make the media settings. If you print without making media settings, problems such as creases, scuff marks, or banding may occur.

U "Media Setting not Available in Printer Driver or Control Panel" on page 4

When **Ready.** is displayed, you can start printing.

Ready.

Plain Paper Thick
Width: 609.6mm

GY VM OR BK VLM LGY LC Y GR MB V C

Media Setting not Available in Printer Driver or Control Panel

You can use one of the following methods to make media settings.

- **Using the Add Media Setting tool**
- **Making custom paper settings**

Using the Add Media Setting Tool

You can add Media Setting over the Internet. Media Setting is loaded in the printer driver or the printer itself.

Media Setting

- ICC profile or print mode
- Print control parameters

→
- • Printer Driver
- • Epson Print Layout
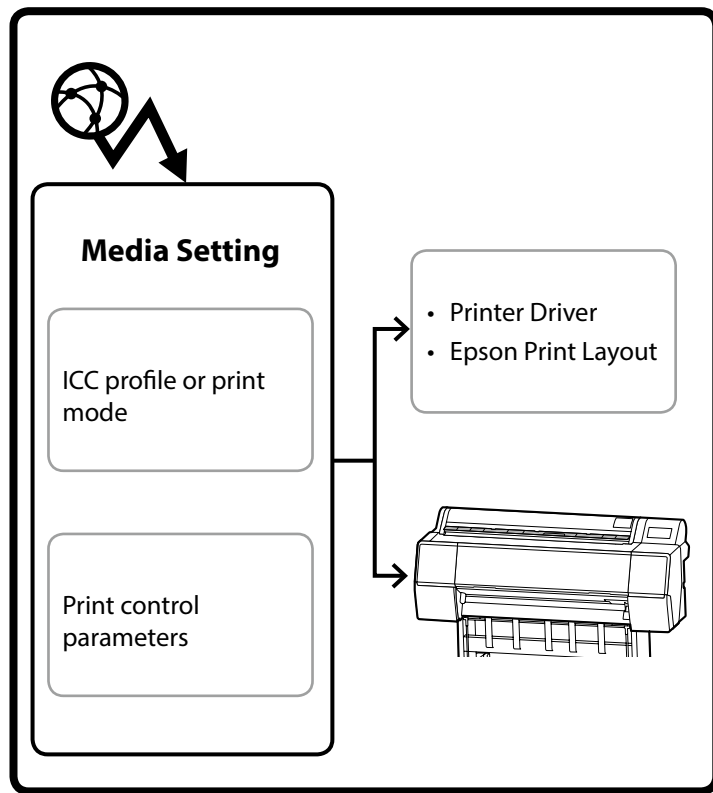

1. Use one of the following methods to open the Add Media Setting screen.

Epson Edge Dashboard

Printer driver (Windows)

Download the latest printer driver from the Epson Website.

Printer driver (Mac)

See the User's Guide for information on how to display the Add screen.

Displays a list of paper information that you can add.

If the Media Setting you want is not available, you can make custom paper settings using this tool. For information on making custom paper settings, see the User's Guide (online manuals).

2. Add the Media Setting.

Select the paper you want, and then click **Download and Register**.

3 Select the paper you want to print on in the Paper Type for the printer driver or in Epson Print Layout.
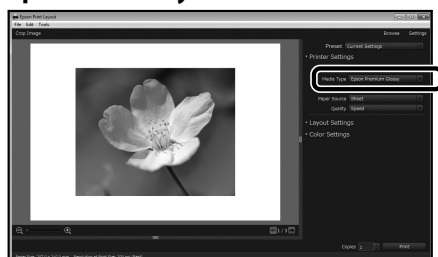

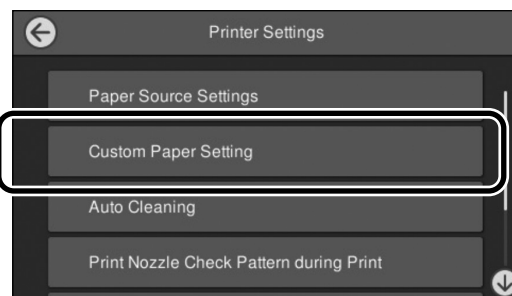

Printer driver (Windows)
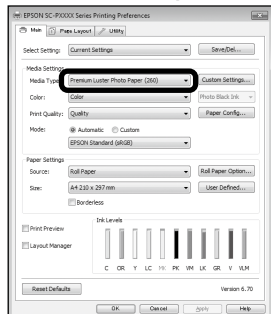

Printer driver (Mac)

Epson Print Layout

Making Custom Paper Settings

1 Select **General Settings** - **Printer Settings** - **Custom Paper Setting** on the control panel.

2 Select the paper number (1 to 30) to which you want to save the settings.

3 Set the paper information.

Make sure you set the following items.

- **Change Reference Paper**
- **Paper Thickness**
- **Roll Core Diameter (Roll paper only)**
- **Paper Feed Offset**

For information on other settings, see the User's Guide (online manuals).

5

Replacing Consumables

A message is displayed on the control panel when it is time to replace consumables. Follow the on-screen instructions to replace the items. Touch **See Description** on the control panel to check the procedure.

Location of Replacement Parts
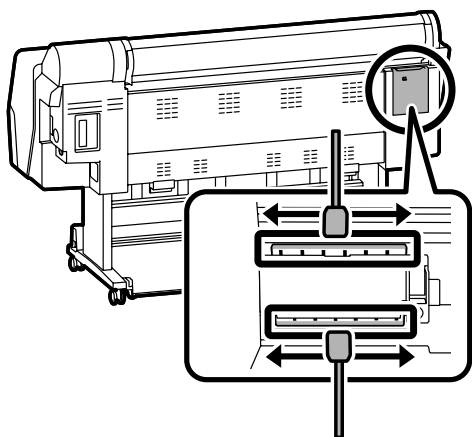

**Ink cartridges and cutter**
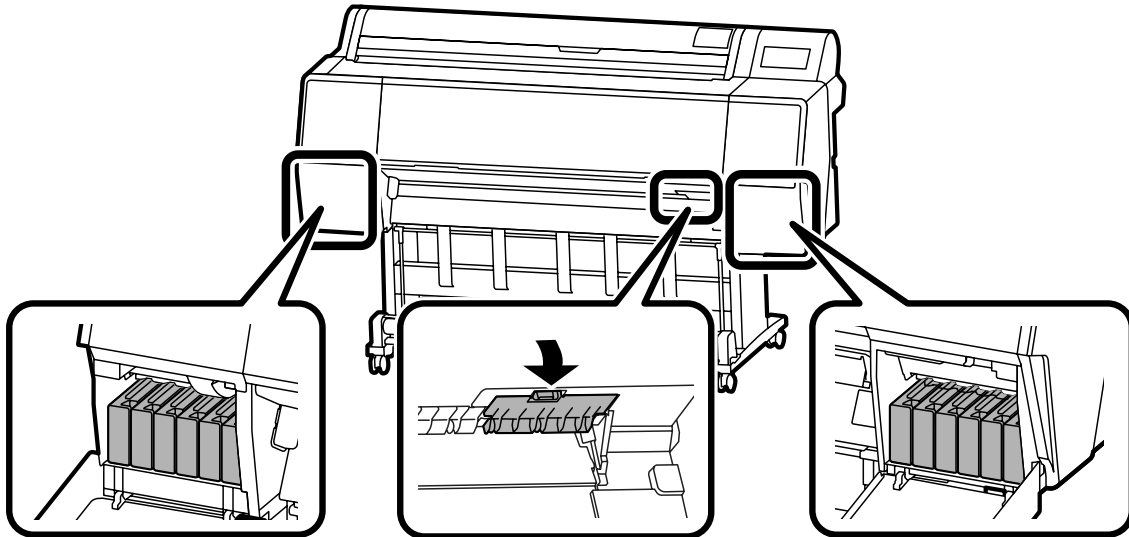

Maintenance box
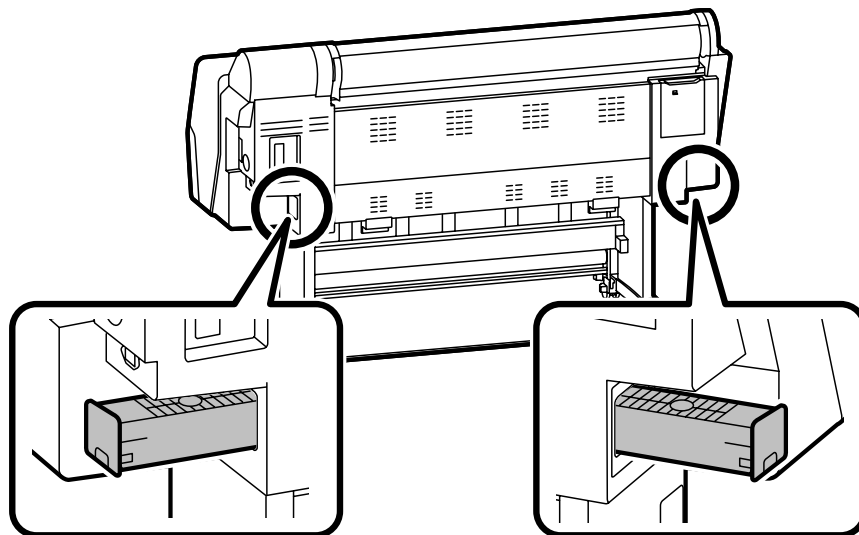

*SC-P9500 Series only

Cleaning the Print Head and Around the Cap

If the print head is clogged and it cannot be cleared using auto cleaning, try cleaning the print head and area around the cap.

Wiping the print head

Wiping around the cap

See the following videos to check the cleaning methods.

http://www.epson-biz.com/?prd=sc-p9500_sc-p7500&inf=playlist

Accessing the Print Head

1 Touch **Maintenance** - **Cleaning the Maintenance Parts** - **Wiping the Print Head** on the control panel.

The print head moves to the cleaning position.

2 Remove the maintenance cover (Rear).
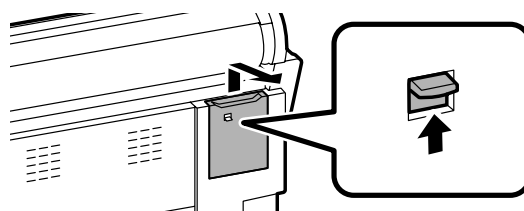

Follow the on-screen instructions to perform cleaning.

Accessing the Area Around the Cap

1 Touch **Maintenance** - **Cleaning the Maintenance Parts** - **Wiping around the Cap** on the control panel.
The print head moves to the cleaning position.

2 Open the ink cover (right), and then remove the maintenance cover (Front).
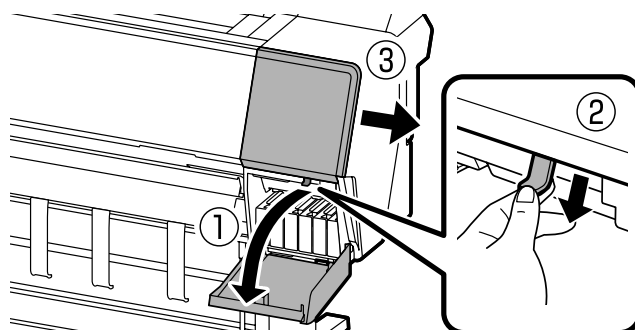

Follow the on-screen instructions to perform cleaning.
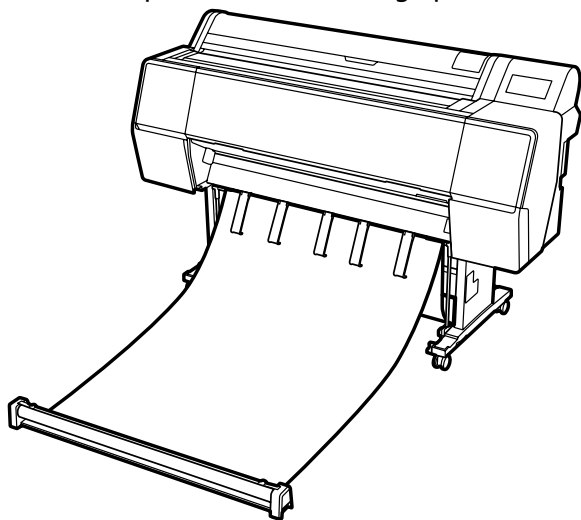

Ejecting Paper to the Basket

You can use the basket to eject paper smoothly and prevent printouts from getting dirty or wrinkled.

> ⚠
> Eject sheets to the basket one at a time. If you allow multiple sheets to pile up in the basket, they may not be ejected correctly.
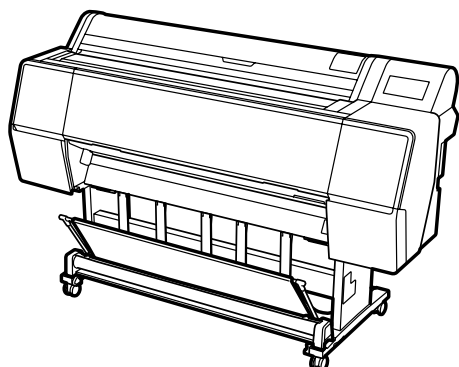

Ejecting from the front of the printer

It is hard to damage the printed surface since the paper is ejected with the printed surface facing up.

Ejecting from the rear of the printer

Allows you to eject paper into a small space. See the User's Guide (online manuals) for information on installing the basket.

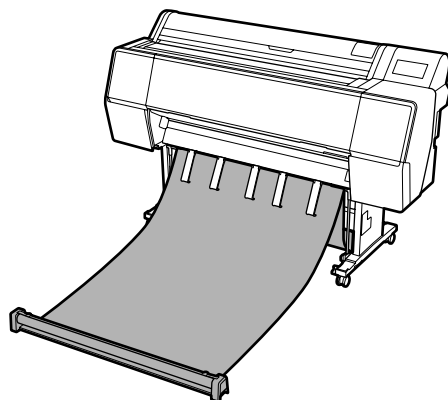

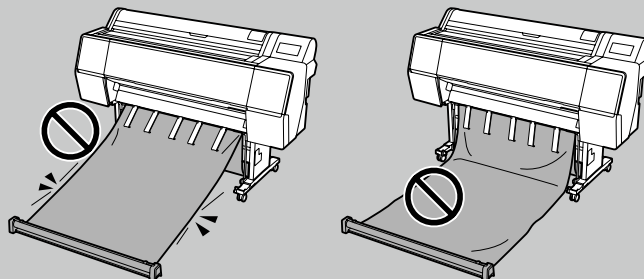

Installing at the Front

1

2
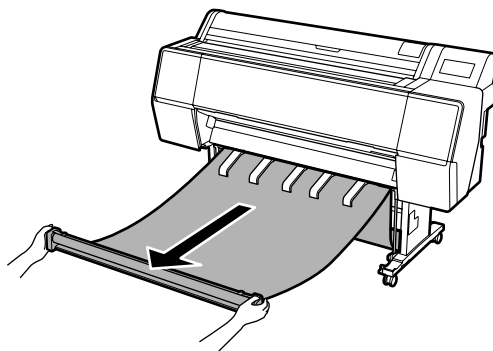

3

> ⚠
> You may not be able to eject correctly if printing is performed when the cloth is too tense or placed on the floor.

Optional Items

The following outlines the optional items for this printer.
See the manual supplied with each optional item for information on installing them.

Hard RIP

Adobe® PostScript® 3™ Expansion Unit

Turns the printer into a Post Script enabled printer.
Install it in the options slot.
You cannot install the Adobe PostScript 3 Expansion Unit and the Hard
Disk Unit at the same time.

Reprinting easily without a PC

Hard Disk Unit

You can save print jobs and reprint them later without using a PC.
Install it in the options slot.
You cannot install the Adobe PostScript 3 Expansion Unit and the Hard
Disk Unit at the same time.

Ideal for banner printing on roll paper

Auto Take-up Reel Unit

Only available for SC-P9500 Series.
Media is taken up automatically during continuous roll paper printing
or banner printing.
Remove the basket to install this item.

Handle color proofing more efficiently

SpectroProofer Mounter

You can perform color measurement automatically by attaching the
color measurement device ILS30EP.
The SpectroProofer Mounters are available for SC-P9500 series and
SC-P7500 series.

Introducing the Software

Printing Software

Print from any application

Printer driver

Use this software to print data sent from a computer to a printer.

Print high-level re-touched data as images
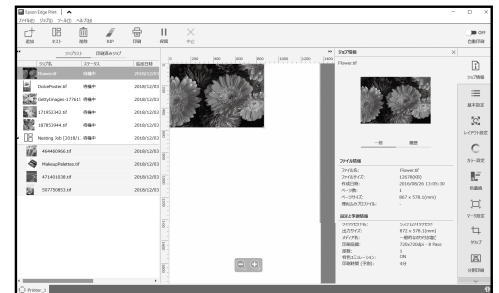

Epson Print Layout

This is plug-in software that is compatible with software such as Adobe® Photoshop® or Adobe® Lightroom®. You can make high-quality prints without having to use unfamiliar software.

Genuine Epson software RIP

Epson Edge Print (optional)

This is genuine Epson software that allows you to maximize the print head and ink performance. It has been optimized for mass production usage.
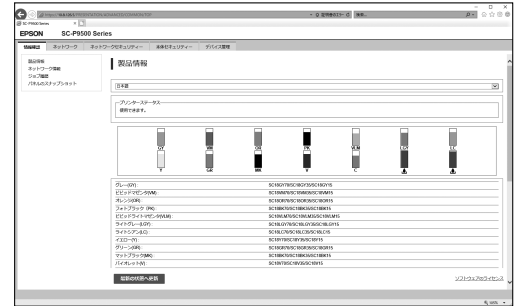

Make a wide variety of settings over a network
Web Config

This software allows you to check and change printer settings using a Web browser. Before you can use Web Config, you need to set an IP address for the printer.
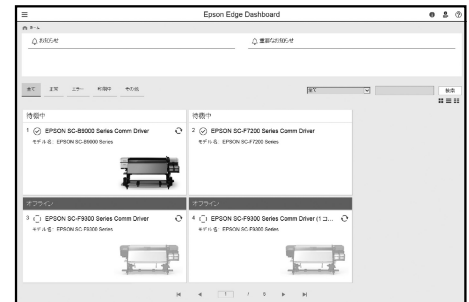

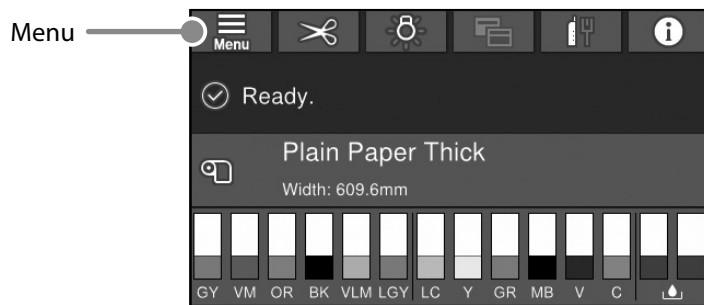

Printer management software
Epson Edge Dashboard

You can view the printer status, add media setting, or update the firmware.
You can manage up to ten printers.
