Important Instructions

Safety Instructions

Read and follow these instructions to ensure safe use of this product. Make sure you keep this manual for future reference. Also, be sure to follow all warnings and instructions marked on the product.

- Some of the symbols used on your product are to ensure safety and proper use of the product. Visit the following Web site to learn the meaning of the symbols.
<http://support.epson.net/symbols>
- Place the product on a flat, stable surface that extends beyond the base of the product in all directions. If you place the product by the wall, leave more than 10 cm between the back of the product and the wall.
- Place the product close enough to the computer for the interface cable to reach it easily. Do not place or store the product outdoors, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, high temperature or humidity, direct sunlight, strong light sources, or rapid changes in temperature or humidity.
- Do not use with wet hands.
- Place the product near an electrical outlet where the power cord plug can be easily unplugged.
- The power cord should be placed to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of the cord and do not allow the power cord to be stepped on or run over. Be particularly careful to keep the cord straight at the end.
- Use only the power cord supplied with the product and do not use the cord with any other equipment. Use of other cords with this product or the use of the supplied power cord with other equipment may result in fire or electric shock.
- Use only the type of power source indicated on the product's label, and always supply power directly from a standard domestic electrical outlet.
- When connecting this product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
- Avoid using outlets on the same circuit as photocopiers or air control systems that regularly switch on and off.
- If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- Never disassemble, modify, or attempt to repair the product, or product option by yourself except as specifically explained in the product's guides.
- Do not insert objects into any opening as they may touch dangerous voltage points or short out parts. Beware of electrical shock hazards.
- If damage occurs to the plug, replace the cord set or consult a qualified electrician. If there are fuses in the plug, make sure you replace them with fuses of the correct size and rating.
- Unplug the product and the power cord, and refer servicing to qualified service personnel under the following conditions: The power cord or plug is damaged; liquid has entered the product; the product or the power cord has been dropped or the case has been damaged; the product or the power cord does not operate normally or exhibits a distinct change in performance. (Do not adjust controls that are not covered by the operating instructions.)

Important Instructions

- Unplug the product and the power cord before cleaning. Clean with a damp cloth only. Do not use liquid or aerosol cleaners.
- If you are not going to use the product or options for a long period, be sure to unplug the power cord from the electrical outlet.
- After replacing consumable parts, dispose of them correctly following the rules of your local authority. Do not disassemble them.
- Keep this product at least 22 cm away from cardiac pacemakers. Radio waves from this product may adversely affect the operation of cardiac pacemakers.
- Do not use this product inside medical facilities or near medical equipment. Radio waves from this product may adversely affect the operation of electrical medical equipment.
- Do not use this product near automatically controlled devices such as automatic doors or fire alarms. Radio waves from this product may adversely affect these devices, and could lead to accidents due to malfunction.
- Do not place heavy objects on the scanner glass and do not press the glass with too much force.

Restrictions on Copying

Observe the following restrictions to ensure the responsible and legal use of your product.

Copying of the following items is prohibited by law:

- Bank bills, coins, government-issued marketable securities, government bond securities, and municipal securities
- Unused postage stamps, pre-stamped postcards, and other official postal items bearing valid postage
- Government-issued revenue stamps, and securities issued according to legal procedure

Exercise caution when copying the following items:

- Private marketable securities (stock certificates, negotiable notes, checks, etc.), monthly passes, concession tickets, etc.
- Passports, driver's licenses, warrants of fitness, road passes, food stamps, tickets, etc.

Note:

Copying these items may also be prohibited by law.

Responsible use of copyrighted materials:

Products can be misused by improperly copying copyrighted materials. Unless acting on the advice of a knowledgeable attorney, be responsible and respectful by obtaining the permission of the copyright holder before copying published material.

Information on Applications

This section introduces the software products available for your scanner. The latest software can be installed at the Epson Web site.

Epson Scan 2

Epson Scan 2 is a driver for controlling your scanner, enabling a variety of scan settings. This also allows you to start either as a standalone application or by using TWAIN-compliant application software.

See the Epson Scan 2 help for details on using the application.

Document Capture Pro / Document Capture

This application allows you to rearrange pages or correct rotation for image data, and then save the data, send it by email, send it to a server, or send it to a cloud service. By registering frequently used scan process settings with a name such as "job", you can scan by simply selecting "job".

Document Capture Pro is for Windows only. For Mac OS X, use Document Capture, and for Windows Server, use Document Capture Pro Server.

See the Document Capture Pro help for details on using the application.

EPSON Software Updater

EPSON Software Updater is an application that checks for new or updated applications on the internet and installs them.

You can also update the scanner's digital manual.

Note:

Windows Server operating systems are not supported.

Epson DocumentScan

Epson DocumentScan is an application that allows you to scan documents through smart devices such as smartphones and tablet devices. You can save the scanned data in smart devices or cloud services, and send by e-mail. You can download and install this app from the App Store or Google Play.

EpsonNet Config

EpsonNet Config is an application that allows you to set network interface addresses and protocols. See the operations guide for EpsonNet Config or the application's help for more details.

Note:

You can run Web Config from EpsonNet Config.

Web Config

Web Config is an application that allows you to boot in a Web browser such as Internet Explorer or Chrome using a computer or a smart device. You can also set a network service or change settings for scanners. Make sure you connect the scanner and devices to the same network when using Web Config.

To run Web Config, enter the IP address of the scanner on web browser. You can check the IP address on Epson Scan 2.

Scanner Basics

Format:

IPv4: http://the scanner's IP address/

IPv6: http://[the scanner's IP address]/

Examples:

IPv4: http://192.168.100.201/

IPv6: http://[2001:db8::1000:1]/

Note:

You can also run Web Config from EpsonNet Config or using WSD port.

Options Information

Network Interface Unit Codes

You can scan through a network by using Document Capture Pro (Windows only). By registering frequently used scan process settings such as save, sort, transfer, and so on, with a name such as "job", you can reduce the workload and increase efficiency by simply selecting "job" on the control panel. See the manual for more details.

Part name	Codes	Specifications
Network Interface Unit *	B12B808451	Available for 1000BASE-T/100BASE-TX/10BASE-T, IPv6, IEEE802.3az

* When mounted, you cannot use the scanner or a computer over a USB connection.

Placing Originals into the ADF

Placing Standard Size Originals

Note:

Remove any documents from the scanner glass. Make sure there is no dust or dirt on the glass and the clear part shown below before scanning.

1. Slide the edge guides on the ADF input tray all the way out. When scanning A4 size paper, raise the stopper.

2. Fan the originals.

Hold both ends of the originals and fan them a few times, and then tap the top edges of the paper on a flat surface to align the sheets.

Specifications of Originals and Placing Originals

3. Place the originals into the ADF input tray facing up and with the top edge facing into the ADF. Slide the originals into the ADF until they meet resistance.

4. Slide the edge guides to fit the edge of the originals making sure there are no gaps between the originals and the edge guides. Otherwise, the originals may be fed askew.

Placing Long Paper

Note:

Remove any documents from the scanner glass. Make sure there is no dust or dirt on the glass and the clear part shown below before scanning.

Specifications of Originals and Placing Originals

1. Slide the edge guides on the ADF input tray all the way out.

2. Load the original into the input tray straight, facing up and with the top edge facing into the ADF. Slide the original into the ADF until it meets resistance.

3. Adjust the edge guides to fit the edge of the long paper making sure there is no gap between the paper edge and the edge guide. Otherwise, the originals may be fed askew or jammed.

Note:

Support the long paper on the input side so that it does not drop out of the ADF, and the output side so that the ejected paper does not fall from the output tray.

Placing Originals on the Scanner Glass

Placing an Original

! *Important:*

- Do not place heavy objects on the scanner glass and do not press the glass with too much force.*
- Do not open the ADF wider than an angle of 70 degrees. This could damage the hinge.*

1. Open the ADF.

2. Place your original face down on the scanner glass making sure the upper corner of the side you want to scan is against the corner of the scanner next to the arrow mark.

Specifications of Originals and Placing Originals

Note:

- ❑ The maximum size of the original you can scan is 216×297 mm (8.5×11.7 in.).
- ❑ You can avoid cropping by moving the original about 2.5 mm (0.1 inches) away from the top and side edges indicated by ① and ② in the following figure.

3. Close the ADF gently so that your original does not move.

Note:

- ❑ Always keep the scanner glass clean.
- ❑ Do not leave originals on the scanner glass for an extended period of time as they may stick.

Placing Thick Originals

! **Important:**

- ❑ Do not place heavy objects on the scanner glass and do not press the glass with too much force.
- ❑ Do not open the ADF wider than an angle of 70 degrees. This could damage the hinge.

Specifications of Originals and Placing Originals

1. Open the ADF.

2. Place your thick original face down on the scanner glass making sure the upper corner of the side you want to scan is against the corner of the scanner next to the arrow mark.

3. Close the ADF gently so that your original does not move.

Note:

If you scan originals over 10 mm (0.4 inch) thick, scan the original by leaving the ADF open and gently pressing down on your original to flatten it.

Basic Scanning

Scanning Using Epson Scan 2

You can scan the originals using detailed settings that are suitable for text documents.

1. Place the original.

Note:

If you want to scan multiple originals, place them into the ADF.

2. Start Epson Scan 2.

Windows 10

Click the start button, and then select **All apps > EPSON > Epson Scan 2**.

Windows 8.1/Windows 8/Windows Server 2012 R2/Windows Server 2012

Enter the application name in the search charm, and then select the displayed icon.

Windows 7/Windows Vista/Windows XP/Windows Server 2008 R2/Windows Server 2008/Windows Server 2003 R2/Windows Server 2003

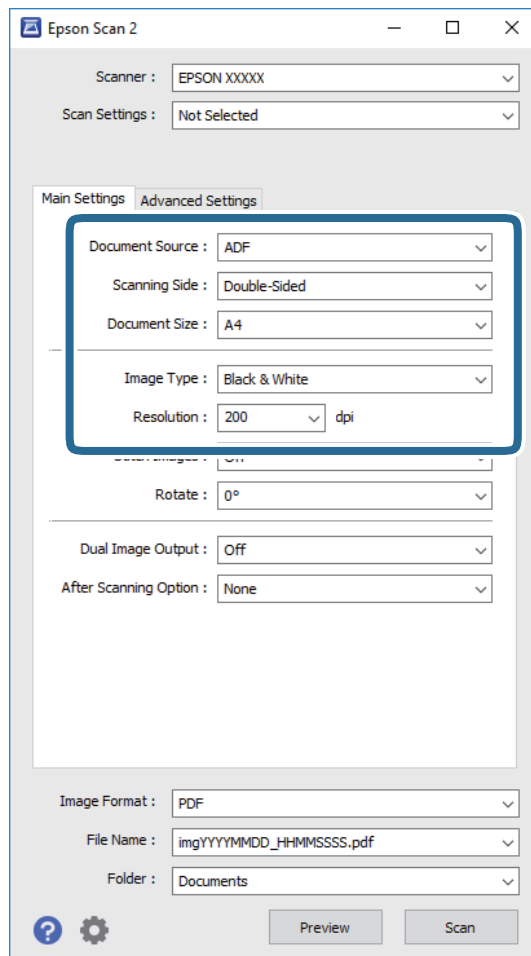

Click the start button, and select **All Programs** or **Programs > EPSON > Epson Scan 2 > Epson Scan 2**.

Mac OS X

Setting a Resolution That Suits the Scanning Purpose

Advantages and Disadvantages of Increasing the Resolution

Resolution indicates the number of pixels (smallest area of an image) for each inch (25.4 mm), and is measured in dpi (dots per inch). The advantage of increasing the resolution is that the details in the image become fine. The disadvantage is that the file size becomes large.

- File size becomes large
(When you double the resolution, the file size becomes about four times larger.)
- Scanning, saving, and reading the image takes a long time
- Sending and receiving emails or faxes takes a long time
- The image becomes too large to fit the display or print on the paper

List of Recommended Resolutions to Suit Your Purpose

See the table and set the appropriate resolution for the purpose of your scanned image.

Purpose	Resolution (Reference)
Displaying on the screen Sending by email	Up to 200 dpi
Using Optical Character Recognition (OCR) Creating a text searchable PDF	200 to 300 dpi
Printing using a printer Sending by fax	200 to 300 dpi

Scanning Using a Scanner Button

You can scan using the button on your scanner.

Note:

- ❑ Make sure that Epson Scan 2 is installed on your computer and the scanner is connected to your computer correctly.
- ❑ When Document Capture Pro (Windows) or Document Capture (Mac OS X) is installed on your computer, you can assign the job to a button on the scanner and run the job by pressing it.
However, this is not available over a wireless connection.

- ❑ When using a wireless connection, launch Epson Scan 2 on your computer before scanning.

If a computer is connected to the scanner by USB while another computer is also connected to the scanner over a wireless connection and Epson Scan 2 is running on this computer, scanned images are saved to the wirelessly connected scanner when you press the scanner button.

1. Place the original.
2. Press the  button.

Note:

When using Document Capture Pro (Windows) or Document Capture (Mac OS X), the product starts the job that was assigned in the **Job Settings** window.

Unsharp Mask

You can enhance and sharpen the outlines of the image.

Note:

*This feature is not available when selecting the **Main Settings** tab > **Image Type** > **Black & White**.*

Advanced Scanning

Descreening

You can remove moiré patterns (web-like shadows) that appear when scanning printed paper such as a magazine.

To check for moiré patterns, display the image at 100 % (1:1). If the displayed image is zoomed out, the image appears rough and may look like it has moiré patterns.

Note:

- To use this feature, set the **Resolution** on the **Main Settings** tab to 600 dpi or less.
- This feature is not available when selecting the **Main Settings** tab > **Image Type** > **Black & White**.
- The effect of this feature cannot be checked in the preview window.
- This feature softens the sharpness of the scanned image.

Image Option

You can select the effect for the scanned image.

Text Enhancement

You can make blurred letters in the original clear and sharp. You can also reduce the offset or unevenness of the background.

You can select the level of the effect when selecting the **Main Settings** tab > **Image Type** > **Color** or **Grayscale**.

Note:

To use this feature, set the **Resolution** on the **Main Settings** tab to 600 dpi or less.

Advanced Scanning

Auto Area Segmentation

You can make letters clear and images smooth when performing black and white scanning for a document that contains images.

You can adjust the quality of the image part of the original from **Brightness** and **Contrast**.

Note:

- You can only make settings for this feature when selecting the **Main Settings** tab > **Image Type** > **Black & White**.
- To use this feature, set the **Resolution** on the **Main Settings** tab to 600 dpi or less.

Dropout

You can remove the color specified from the scanned image, and then save it in grayscale or black and white. For example, you can erase marks or notes you wrote in the margins with color pen when scanning.

If you select **Customize** from the color list in **Dropout**, you can make settings for the color you want to remove while checking the preview window (for Windows only).

Note:

This feature is not available when selecting the **Main Settings** tab > **Image Type** > **Auto** or **Color**.

Color Enhance

You can enhance the color specified for the scanned image, and then save it in grayscale or black and white. For example, you can enhance letters or lines that are in light colors.

If you select **Customize** from the color list in **Color Enhance**, you can make settings for the color you want to enhance while checking the preview window (for Windows only).

Note:

This feature is not available when selecting the **Main Settings** tab > **Image Type** > **Auto** or **Color**.

Advanced Scanning

Brightness

You can adjust the brightness for the whole image.

Note:

*This feature is not available depending on the settings on the **Main Settings** tab > **Image Type** or the settings on the **Advanced Settings** tab.*

Contrast

You can adjust the contrast for the whole image. If you increase the contrast, the bright areas become brighter, and the dark areas become darker. On the other hand, if you lower the contrast, the differences between the bright and dark areas of the image are less defined.

Note:

*This feature is not available depending on the settings on the **Main Settings** tab > **Image Type** or the settings on the **Advanced Settings** tab.*

Gamma

You can adjust the gamma (brightness of the intermediate range) for the whole image. If the image is too light or too dark, you can adjust the brightness.

Note:

*This feature is not available depending on the settings on the **Main Settings** tab > **Image Type** or the settings on the **Advanced Settings** tab.*

Note:

*This feature may not be available depending on the settings on the **Main Settings** tab > **Image Type** or the settings on the **Advanced Settings** tab.*

Skip Blank Pages

You can skip blank pages if there are any in the originals.

You can select the amount of blank page detection. If you set this to a high level, you can skip any originals with light colors or offset as blank pages.

If the result is not what you expected, select **Skip Blank Pages > Settings**, and then adjust **User Defined Level**. Select again **Skip Blank Pages > User Defined Level**.

Note:

- Some pages may be incorrectly skipped as blank pages.*
- This feature is not available when scanning double-sided originals that are stitched.*

Edge Fill

You can remove the shadow created around the scanned image.

For double-sided scanning, the settings for the edge fill range are mirror-reversed for the back of the original.

If you select **Settings**, the **Edge Fill Level** screen is displayed, and you can adjust the edge fill ranges for the top, bottom, left, and right.

Note:

The effect of this feature cannot be checked in the preview window.

Advanced Scanning

Correct Document Skew

You can correct the slant of the original.

Off

The slant of the original is not corrected.

Paper Skew

Corrects the slant of originals that are fed askew.

Contents Skew

Corrects the slant of the content of the original that was printed at an angle and so on.

Paper and Contents Skew

Corrects the slant of the original that is fed askew as well as the content of the original.

Note:

- When using this feature, areas that are fed askew are corrected using white.
- To use this feature, set the **Resolution** on the **Main Settings** tab to 600 dpi or less.
- This feature may not be able to correct documents that have been over skewed.
- The effect of this feature cannot be checked in the preview window.

Remove Punch Holes

You can remove the shadows of holes on the scanned image when scanning originals with punched holes.

You can remove the shadows of round or square punch holes that are within a range of 20 mm (0.79 in.) from the edges of the original.

Note:

- This feature is only available when you are scanning white or light colored originals.
- Depending on the scanned originals, the shadows of the punch holes may not be removed.
- The effect of this feature cannot be checked in the preview window.

Editing Scanned Pages Using Epson Scan 2

You can edit pages of scanned images using the features on the **Main Settings** tab in Epson Scan 2.

Stitch Images

You can stitch the images on the front and rear when scanning both sides of the original. Select the layout for stitching the images.

Note:

*This feature is available when you have selected **Double-Sided** in **Scanning Side**.*

Rotate

You can rotate the original clockwise and scan it. Select the rotation angle depending on the original you want to scan.

Note:

*If you select **Auto** and scan the original, the image is rotated by detecting the orientation of the text information. However, this may take some time depending on the image size, and so on.*

***Auto** is only available if the EPSON Scan OCR component (Windows) or EPSON Scan 2 OCR component (Mac OS X) is installed.*

Saving as a Searchable PDF

You can save the scanned image as a Searchable PDF. This is a PDF in which searchable text data is embedded.

Note:

- Text on the originals is recognized using Optical Character Recognition (OCR), and then embedded in the scanned image.*
- This feature is only available when the EPSON Scan OCR component (Windows) or Epson Scan 2 OCR component (Mac OS X) is installed.*

1. Place the original.
2. Start Epson Scan 2.
3. Make settings for each item on the **Main Settings** tab.
4. Click **Preview**.
5. Place the ejected original again when using the ADF.
6. Check the preview, and make other settings on the **Advanced Settings** tab if necessary.
7. Select **Searchable PDF** from the **Image Format** list.
8. Select **Options** from the **Image Format** list to open the **Image Format Options** window.
9. Select the **Text** tab on the **Image Format Options** window.
10. Check that the language of the original is selected in the **Text Language** list.

Advanced Scanning

11. Click **OK** to close the **Image Format Options** window.
12. Check the save file name displayed in **File Name**.
13. Select the save folder for the scanned image from the **Folder** list.
14. Click **Scan**.

The scanned image is saved as a Searchable PDF.

5. Click **OK** to close the **Job Settings** window.
6. Click **OK** on the **Job Management** window.
The job is set in the Document Capture Pro or Document Capture.

Assigning a Job to the Scanner Button

You can assign a job to the scanner's button, and run the job by pressing the button.

1. Start Document Capture Pro (Windows) or Document Capture (Mac OS X).
2. Click the  (**Manage Job**) icon on the main window.
The **Job Management** window is displayed.
3. Click **Event Settings** on the **Job Management** window (Windows), or click the  icon at the bottom of the screen (Mac OS X).
4. Click the job name to select the job you want to assign from the pull-down menu.
5. Click **OK** on the **Job Management** window.
The job is assigned to the scanner button.

Scanning from Smart Devices Using NFC Tag

You can connect your smart device and the scanner automatically using the Epson DocumentScan application and the NFC (Near Field Communication) function.

This feature is available for smart devices running Android 4.0 or later and that support NFC.

Before using this feature, enable the NFC function on your smart device.

Note:

- ❑ *The location of the NFC antenna varies depending on the smart device. See the documentation provided with your smart device for more details.*
- ❑ *If the scanner does not communicate with the smart device even after touching it to the tag, try adjusting the position of the smart device and touch it to the tag again.*
- ❑ *If there are obstacles such as metal between the scanner's NFC tag and the NFC antenna of the smart device, the scanner may not be able to communicate with the smart device.*
- ❑ *If the scanner is already connected to the Wi-Fi network before using this feature, your smart device will be connected to the scanner using this network. If not, the scanner and your smart device will be connected in AP mode. In AP mode, you can connect up to four devices to the scanner at the same time.*

1. Place the original.
2. Make sure that Epson DocumentScan is installed on your smart device.

If not, touch the NFC tag antenna of the smart device to the scanner's NFC tag. Install Epson DocumentScan on the displayed application page.

3. Touch the NFC antenna of your smart device to the scanner's NFC tag.
Epson DocumentScan starts, and the scanner and the smart device are connected automatically.
4. Follow the Epson DocumentScan on-screen instructions for information on scanning.

Network Settings

Network Connection Types

Wi-Fi Connection

Connect the scanner and the computer or smart device to the access point. This is the typical connection method for home or office networks where computers are connected by Wi-Fi through the access point.

AP Mode Connection

Use this connection method when you are not using Wi-Fi at home or at the office, or when you want to connect the scanner and the smart device directly. In this mode, the scanner acts as an access point and you can connect up to four devices to the scanner without having to use a standard access point. However, devices directly connected to the scanner cannot communicate with each other through the scanner.

Network Settings

Note:

AP mode is a connection method designed to replace Ad Hoc mode.

The scanner can be connected by Wi-Fi and AP mode simultaneously. However, if you start a network connection in AP mode when the scanner is connected by Wi-Fi, the Wi-Fi is temporarily disconnected.

Connecting to a Computer

We recommend using the installer to connect the scanner to a computer. You can run the installer using one of the following methods.

 Setting up from the website

Access the following website, and then enter the product name.

<http://epson.sn>

Go to **Setup**, and then click **Download** in the download and connect part. Click or double-click the downloaded file to run the installer. Follow the on-screen instructions.

 Setting up using the software disc (only for the models that come with a software disc and users with computers with disc drives.)

Insert the software disc into the computer, and then follow the on-screen instructions.

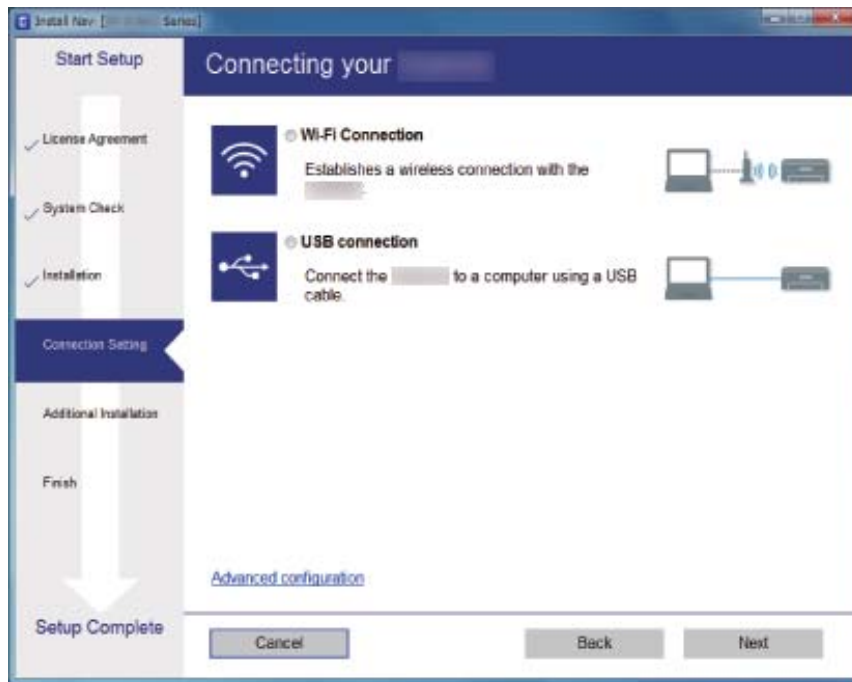

Selecting the Connection Methods

Follow the on-screen instructions until the following screen is displayed and then select the connection method of the scanner to the computer.

Network Settings

Windows

Select the connection type and then click **Next**.

Mac OS X

Select the connection type.

Follow the on-screen instructions. The necessary software is installed.

Connecting to a Smart Device

You can use the scanner from a smart device when you connect the scanner to the same Wi-Fi network (SSID) as the smart device. To use the scanner from a smart device, set up from Epson DocumentScan.

Note:

- ❑ *If you want to connect a computer and a smart device to the scanner at the same time, we recommend connecting the computer first.*
- ❑ *You can install Epson DocumentScan from App Store or Google Play.*

Making Wi-Fi Settings from the Control Panel

You can make network settings from the scanner's control panel. After connecting the scanner to the network, connect to the scanner from the device that you want to use (computer, smart phone, tablet, and so on.)

Making Wi-Fi Settings by Push Button Setup (WPS)

You can automatically set up a Wi-Fi network by pressing a button on the access point. If the following conditions are met, you can set up by using this method.

- ❑ The access point is compatible with WPS (Wi-Fi Protected Setup).
- ❑ The current Wi-Fi connection was established by pressing a button on the access point.

Note:

If you cannot find the button or you are setting up using the software, see the documentation provided with the access point.

1. Hold down the [WPS] button on the access point until the security light flashes.

If you do not know where the [WPS] button is, or there are no buttons on the access point, see the documentation provided with your access point for details.

2. Press the  button on the scanner's control panel until the  light flashes blue (approximately 3 seconds).
The connection setting starts. The  light and  light flash alternately.
The  light is lit blue when connection is complete.

Network Settings

Note:

Connection fails when the  light turns on. After releasing the error by pressing the  button, restart the access point, move it closer to the scanner, and then try again.

Making Wi-Fi Settings by PIN Code Setup (WPS)

You can automatically connect to an access point by using a PIN code. You can use this method to set up if an access point is capable of WPS (Wi-Fi Protected Setup). Use a computer to enter a PIN code into the access point.

1. Press the  button and the  button on the scanner's control panel simultaneously until  light flashes in blue (approximately 3 seconds).
2. Use your computer to enter the PIN code (an eight-digit number) on the label stuck to the scanner into the access point within two minutes.

The connection setting starts. The  light and  light flash alternately.

The  is lit blue when connection is complete.

Note:

- See the manual provided with your access point for details on entering a PIN code.
- Connection fails when the  light turns on. After releasing the error by pressing the  button, restart the access point, move it closer to the scanner, and then try again.

Making AP Mode Settings

This method allows you to connect the scanner directly to devices without an access point. The scanner acts as an access point.

Important:

When you connect from a smart device to the scanner using the AP mode connection, the scanner is connected to the same Wi-Fi network (SSID) as the smart device and communication is established between them. Since the smart device is automatically connected to other connectable Wi-Fi networks if the scanner is turned off, it is not connected to the previous Wi-Fi network again if the scanner is turned on. Connect to the scanner's SSID in AP mode from the smart device again. If you do not want to connect every time you turn the scanner on or off, we recommend using a Wi-Fi network by connecting the scanner to an access point.

Network Settings

1. Press the  button on the scanner's control panel.
The AP light is lit blue when AP mode connection is enabled.
2. Connect from the smart device or computer to the scanner using the scanner's SSID and password.

Note:

- You can check the SSID and password on the label stuck to the scanner.
- See the documentation provided with your smart device or computer for the operating instructions.

Selecting Change the Connection Methods

Follow the on-screen instructions until the following screen is displayed.

Windows

Select **Change or re-set the connection method** on the Select Software Installation screen, and then click **Next**.

Mac OS X

Select how you want to connect the scanner to your computer.

Disabling the Network Setting from the Control Panel

You can disable the network settings.

Network Settings

1. Press the  button for more than 3 seconds to disable a Wi-Fi and AP mode connection.

The  light and  light turn off when these are disabled.

Note:

Press the  button to re-connect Wi-Fi and AP mode.

Restoring the Network Settings from the Control Panel

You can restore all network settings to their defaults.

1. Turn the scanner off.
2. While holding down the  button, press the  button until  light and  light turn on simultaneously.
The  light and  light flash alternately and then turn off when restoration is complete.

Maintenance

Cleaning Outside the Scanner

Wipe off any stains on the outer case with a dry cloth or a cloth dampened with mild detergent and water.

! *Important:*

- Never use alcohol, thinner, or any corrosive solvent to clean the scanner. Deformation or discoloration may occur.*
- Do not let water get inside the product. This could cause a malfunction to occur.*
- Never open the scanner case.*

1. Press the  button to turn off the scanner.
2. Unplug the power cord from the scanner.
3. Clean the outer case with a cloth dampened with mild detergent and water.

Cleaning the ADF

After using the scanner for a while, paper and room dust in the paper path may cause paper feed or scanned image quality problems. In such cases, or when a message asking you to perform cleaning is displayed on your computer, clean the ADF.

! *Important:*

- Never use alcohol, thinner, or any corrosive solvent to clean the scanner. Deformation or discoloration may occur.*
- Never spray any liquid or lubricant on the scanner. Damage to equipment or circuits may cause abnormal operations.*
- Never open the scanner case.*

1. Open the ADF cover.

Maintenance

2. Use a soft, dry cloth to wipe off paper and room dusts on the roller.

3. Close the ADF cover.

4. Open the ADF.

Maintenance

5. Remove the document mat.

6. Use a soft, dry, clean cloth to clean the clear parts on the reverse side of the document mat.

! *Important:*

Do not wipe the clear part with too much force. Otherwise, the clear part may be damaged.

7. Attach the document mat.

Maintenance

8. Close the ADF.

Cleaning the Scanner Glass

When the scanned images are smeared or scuffed, clean the scanner glass.

! *Important:*

- Never use alcohol, thinner, or any corrosive solvent to clean the scanner. Deformation or discoloration may occur.*
- Never spray any liquid or lubricant on the scanner. Damage to equipment or circuits may cause abnormal operations.*
- Never open the scanner case.*

1. Open the ADF.

2. Use a soft, dry, clean cloth to clean the surface of the scanner glass.

Maintenance

! **Important:**

- Do not place too much force on the glass surface.
- Do not use a brush or a hard stuff. Any scratches on the glass may affect the scan quality.
- If the glass surface is stained with grease or some other hard-to-remove material, use a small amount of glass cleaner on a soft cloth to remove it. Wipe off all remaining liquid.

3. Close the ADF.

Energy Saving

You can save energy by using the sleep mode or auto power off mode when no operations are performed by the scanner. You can set the time period before the scanner enters sleep mode and turns off automatically. Any increase will affect the product's energy efficiency. Consider the environment before making any changes.

1. Start Epson Scan 2 Utility.

- Windows 10

Click the start button, and then select **All apps > EPSON > Epson Scan 2 > Epson Scan 2 Utility**.

- Windows 8.1/Windows 8/Windows Server 2012 R2/Windows Server 2012

Start screen > Apps > Epson > Epson Scan 2 Utility.

- Windows 7/Windows Vista/Windows XP/Windows Server 2008 R2/Windows Server 2008/Windows Server 2003 R2/Windows Server 2003

Click the start button, and then select **All Programs (or Programs) > EPSON > Epson Scan 2 > Epson Scan 2 Utility**.

- Mac OS X

Select **Go > Applications > EPSON Software > Epson Scan 2 Utility**.

2. Click the **Power Save** tab.

Maintenance

3. Set the **Sleep Timer (minutes)** or **Power Off Timer (minutes)**, and then click **Set**.

Transporting the Scanner

When you need to transport the scanner to move or for repairs, follow the steps below to pack the scanner.

Caution:

When carrying the scanner, place your hands at the bottom on both sides of the scanner, and then keep it in a horizontal position. If the scanner is tilted or placed vertically while carrying, the ADF may open. This could cause an injury.

1. Press the  button to turn off the scanner.
2. Unplug the power cord from the scanner.
3. Remove the USB cable.
4. Make sure that there is no original inside the scanner.
5. Attach the packing materials that came with the scanner, and then repack the scanner in its original box or a sturdy box.

Updating Applications and Firmware

You may be able to clear certain problems and improve or add functions by updating the applications and the firmware. Make sure you use the latest version of the applications and firmware.

Maintenance

1. Make sure that the scanner and the computer are connected, and the computer is connected to the internet.
2. Start EPSON Software Updater, and update the applications or the firmware.

Note:

Windows Server operating systems are not supported.

Windows 10

Click the start button, and select **All apps > Epson Software > EPSON Software Updater**.

Windows 8.1/Windows 8

Enter the application name in the search charm, and then select the displayed icon.

Windows 7/Windows Vista/Windows XP

Click the start button, and then select **All Programs** or **Programs > Epson Software > EPSON Software Updater**.

Mac OS X

Select **Finder > Go > Applications > Epson Software > EPSON Software Updater**.

Important:

Do not turn off the computer or the scanner while updating.

Note:

If you cannot find the application you want to update in the list, you cannot update using the EPSON Software Updater. Check for the latest versions of the applications on your local Epson website.

Solving Problems

Scanner Problems

Scanner Lights Indicate an Error

Check the following if the scanner lights indicate an error.

- Make sure there are no originals jammed in the scanner.
- Make sure the scanner cover is closed.
- Make sure the scanner is connected to your computer properly.
 - If a Wi-Fi connection error has occurred, check the Wi-Fi connection settings.
- Make sure Epson Scan 2 is installed correctly.
- If the firmware update fails and the scanner enters recovery mode, update the firmware again using a USB connection.
- Turn off the scanner and turn it on again. If this does not solve the problem, the scanner may be malfunctioning, or the light source in the scanner unit may need to be replaced. Contact your dealer.

The Scanner Does Not Turn On

- Make sure the power cord is securely connected to the scanner and an electrical outlet.
- Check that the electrical outlet is working. Plug another device into the electrical outlet and check that you can turn the power on.

Problems Starting Scanning

Cannot Start Epson Scan 2

- Make sure the scanner is connected to your computer properly.
 - If a Wi-Fi connection error has occurred, check the Wi-Fi connection settings.
- Make sure the USB cable is securely connected to the scanner and the computer.
- Use the USB cable that came with the scanner.
- If you are using the scanner with the Network Interface Unit, make sure the network cable is securely connected.
- Make sure the scanner is turned on.

Solving Problems

- ❑ Wait until the status light stops flashing indicating that the scanner is ready to scan.
- ❑ Connect the scanner directly to the computer's USB port. The scanner may not work properly when connected to the computer through one or more USB hubs.
- ❑ If you are using any TWAIN-compliant applications, make sure that the correct scanner is selected as the scanner or source setting.

Pressing a Scanner Button Does Not Start the Correct Application

- ❑ Make sure the scanner is connected to your computer properly.
- ❑ Make sure Epson Scan 2 and other applications are installed correctly.
- ❑ Make sure Document Capture Pro (Windows) or Document Capture (Mac OS X) is installed correctly.
- ❑ Check the correct setting is assigned to the scanner button in Document Capture Pro (Windows) or Document Capture (Mac OS X).
- ❑ When using a wireless connection, you cannot run the job assigned to a scanner button by pressing it because Document Capture Pro and Document Capture do not support scanning from the button over a wireless connection.

To start scanning by pressing the button, launch Epson Scan 2 on your computer before scanning.

Paper Feeding Problems

Removing Jammed Originals from the Scanner

If an original has jammed in the ADF, follow these steps to remove it.

1. Remove all originals remaining in the input tray.
2. Open the ADF cover and remove the jammed originals.

Solving Problems

3. If you cannot remove the originals, raise the ADF. Make sure the ADF cover is open while you raise the ADF.

4. Remove the document mat.

Solving Problems

- Carefully pull out any jammed originals from inside the scanner.

- Attach the document mat.
- Close the ADF, and then close the ADF cover.

Multiple Originals Are Fed

If multiple originals are fed frequently, try the following.

- If you load unsupported originals, the scanner may feed multiple originals at a time.
- Clean the ADF.
- Reduce the number of originals being placed at a time.

Scanning Speed Slows Down when Scanning Continuously

When scanning continuously using the ADF, scanning slows down to prevent the scanner mechanism from overheating and being damaged. However, you can continue scanning.

To regain normal scanning speed, leave the scanner idle for at least 30 minutes. Scanning speed does not recover even if the power is off.

Scanning Takes a Long Time

- ❑ When the resolution is high, scanning may take some time.
- ❑ Computers with USB 3.0 (SuperSpeed) or USB 2.0 (Hi-Speed) ports can scan faster than those with USB 1.1 ports. If you are using a USB 3.0 or USB 2.0 port with the scanner, make sure it meets the system requirements.
- ❑ When using security software, exclude the TWAIN.log file from monitoring, or set the TWAIN.log as a read-only file. For more information on your security software's functions, see the help and so on supplied with the software. The TWAIN.log file is saved in the following locations.
 - ❑ Windows 10/Windows 8.1/ Windows 8/ Windows 7/ Windows Vista:
C:\Users*(user name)*\AppData\Local\Temp
 - ❑ Windows XP:
C:\Documents and Settings*(user name)*\Local Settings\Temp

Scanned Image Problems

Uneven Colors, Dirt, Spots, and so on Appear when Scanning from the Scanner Glass

- ❑ Clean the scanner glass.

Cannot Scan the Correct Area on the Scanner Glass

- ❑ Make sure the original is placed correctly against the alignment marks.
- ❑ If the edge of the scanned image is missing, move the original slightly away from the edge of the scanner glass.

The Edge of the Original is Not Scanned when Automatically Detecting the Size of the Original

- ❑ In Epson Scan 2, select the **Main Settings** tab, and then select **Document Size > Settings**. On the **Document Size Settings** window, adjust **Crop Margins for Size "Auto"**.
- ❑ Depending on the original, the area of the original may not be detected correctly when using the **Auto Detect** feature. Select the appropriate size of the original from the **Document Size** list.

Note:

*If the size of the original you want to scan is not on the list, select **Customize**, and then create the size manually.*

Text is Not Recognized Correctly when Saving as a Searchable PDF

- ❑ On the **Image Format Options** window in Epson Scan 2, check that **Text Language** is set correctly on the **Text** tab.
- ❑ Check that the original is placed straight.

Solving Problems

- ❑ Use an original with clear text. Text recognition may decline for the following types of originals.
 - ❑ Originals that have been copied a number of times
 - ❑ Originals received by fax (at low resolutions)
 - ❑ Originals on which the letter spacing or line spacing is too small
 - ❑ Originals with ruled lines or underlining over the text
 - ❑ Originals with hand-written text
 - ❑ Originals with creases or wrinkles
- ❑ In Epson Scan 2, when **Image Type** on the **Main Settings** tab is set to **Black & White**, adjust the **Threshold** on the **Advanced Settings** tab. When you increase the **Threshold**, the black color area becomes larger.

Network Problems

When You Cannot Make Network Settings

Turn off the devices you want to connect to the network. Wait for about 10 seconds, and then turn on the devices in the following order; access point, computer or smart device, and then scanner. Move the scanner and computer or smart device closer to the access point to help with radio wave communication, and then try to make network settings again.

Cannot Connect from Devices Even Though Network Settings are No Problems

If you cannot connect from the computer or smart device to the scanner even though network settings of the scanner are no problem, see the following.

- ❑ When you are using multiple access points at the same time, you may not be able to use the scanner from the computer or smart device depending on the settings of the access points. Connect the computer or smart device to the same access point as the scanner.

Solving Problems

- ❑ You may not be able to connect to the access point when the access point has multiple SSIDs and devices are connected to different SSIDs on the same access point. Connect the computer or smart device to the same SSID as the scanner.

- ❑ An access point that is compliant with both IEEE802.11a and IEEE802.11g has SSIDs of 2.4 GHz and 5 GHz. If you connect the computer or smart device to a 5 GHz SSID, you cannot connect to the scanner because the scanner only supports communication over 2.4 GHz. Connect the computer or smart device to the same SSID as the scanner.

- ❑ Most access points have a privacy separator feature that blocks communication between connected devices. If you cannot communicate between the scanner and the computer or smart device even if they are connected to the same network, disable the privacy separator on the access point. See the manual provided with the access point for details.

Checking the SSID Connected to the Scanner

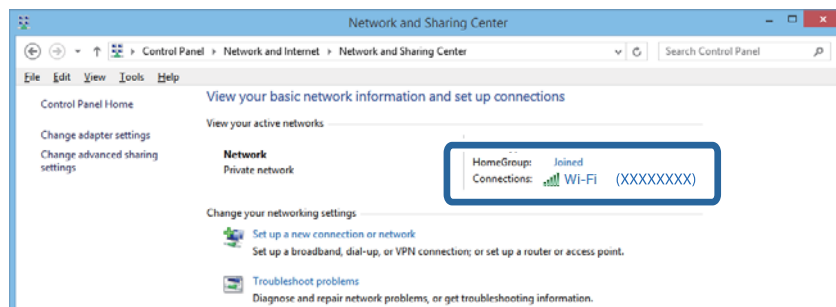

You can check the connected SSID on Web Config.

And you can check the SSID and password of scanner itself on the label stuck to the scanner. These are used when you connect the scanner in AP mode connection.

Checking the SSID for the Computer

Windows

Select **Control Panel > Network and Internet > Network and Sharing Center**.

Mac OS X

Click the Wi-Fi icon at the top of the computer screen. A list of SSIDs is displayed and the connected SSID is indicated with a check mark.

The Scanner Suddenly Cannot Scan over a Network Connection

- ❑ When you have changed your access point or provider, try making network settings for the scanner again. Connect the computer or smart device to the same SSID as the scanner.

Solving Problems

- ❑ Turn off the devices you want to connect to the network. Wait for about 10 seconds, and then turn on the devices in the following order; access point, computer or smart device, and then scanner. Move the scanner and computer or smart device closer to the access point to help with radio wave communication, and then try to make network settings again.
- ❑ Try accessing any website from your computer to make sure that your computer's network settings are correct. If you cannot access any websites, there is a problem on the computer. See the manual provided with your computer for more details.
- ❑ Check if the network setting is correct on Epson Scan 2 Utility.
- ❑ When scanning from the scanner button, make sure you start Epson Scan 2 on your computer before pressing the scanner button.

The Scanner Suddenly Cannot Scan Using a USB Connection

- ❑ Disconnect the USB cable from the computer. Right-click on the scanner icon displayed on the computer, and then select **Remove Device**. Connect the USB cable to the computer and try a test scan. If scanning is possible, the setup is complete.
- ❑ Re-set the USB connection following the steps in [Changing the Connection Method to a Computer] in this manual.
- ❑ If a computer is connected to the scanner by USB while another computer is also connected to the scanner over a wireless connection and Epson Scan 2 is running on this computer, scanned images are saved to the wirelessly connected scanner when you press the scanner button. Scan from the computer instead of using the scanner button or close Epson Scan 2 on the wirelessly connected computer.

Uninstalling and Installing Applications

Uninstalling Your Applications

You may need to uninstall and then reinstall your applications to solve certain problems or if you upgrade your operating system. Log on to your computer as an administrator. Enter the administrator password if the computer prompts you.

Uninstalling Your Applications for Windows

1. Quit all running applications.
2. Disconnect the scanner from your computer.

Solving Problems

3. Open the Control Panel:
 - Windows 10
Right-click the start button or press and hold it, and then select **Control Panel**.
 - Windows 8.1/Windows 8/Windows Server 2012 R2/Windows Server 2012
Select **Desktop > Settings > Control Panel**.
 - Windows 7/Windows Vista/Windows XP/Windows Server 2008 R2/Windows Server 2008/Windows Server 2003 R2/Windows Server 2003
Click the start button and select **Control Panel**.
4. Open **Uninstall a program** (or **Add or Remove Programs**):
 - Windows 10/Windows 8.1/Windows 8/Windows 7/Windows Vista/Windows Server 2012 R2/Windows Server 2012/Windows Server 2008 R2/Windows Server 2008
Select **Uninstall a program** in **Programs**.
 - Windows XP/Windows Server 2003 R2/Windows Server 2003
Click **Add or Remove Programs**.
5. Select the application you want to uninstall.
6. Uninstall the applications:
 - Windows 10/Windows 8.1/Windows 8/Windows 7/Windows Vista/Windows Server 2012 R2/Windows Server 2012/Windows Server 2008 R2/Windows Server 2008
Click **Uninstall/Change** or **Uninstall**.
 - Windows XP/Windows Server 2003 R2/Windows Server 2003
Click **Change/Remove** or **Remove**.

Note:
If the User Account Control window is displayed, click Continue.
7. Follow the on-screen instructions.

Note:
*A message may be displayed prompting you to restart your computer. If it is displayed, make sure **I want to restart my computer now** is selected, and then click **Finish**.*

Uninstalling Your Applications for Mac OS X

Note:
Make sure you installed EPSON Software Updater.

1. Download the Uninstaller using EPSON Software Updater.
Once you have downloaded the Uninstaller, you do not need to download it again each time you uninstall the application.
2. Disconnect the scanner from your computer.
3. To uninstall the scanner driver, select **System Preferences** from the  menu > **Printers & Scanners** (or **Print & Scan, Print & Fax**), and then remove the scanner from the enabled scanner list.
4. Quit all running applications.

Solving Problems

5. Select **Finder > Go > Applications > Epson Software > Uninstaller**.
6. Select the application you want to uninstall, and then click Uninstall.

**Important:**

The Uninstaller removes all drivers for Epson scanners on the computer. If you use multiple Epson scanners and you only want to delete some of the drivers, delete all of them first, and then install the necessary scanner drivers again.

Note:

*If you cannot find the application you want to uninstall in the application list, you cannot uninstall using the Uninstaller. In this situation, select **Finder > Go > Applications > Epson Software**, select the application you want to uninstall, and then drag it to the trash icon.*

Installing Your Applications

Follow the steps below to install the necessary applications.

Note:

- Log on to your computer as an administrator. Enter the administrator password if the computer prompts you.
- When reinstalling applications, you need to uninstall them first.

1. Quit all running applications.
2. When installing Epson Scan 2, disconnect the scanner and the computer temporarily.

Note:

Do not connect the scanner and the computer until you are instructed to do so.

3. Install the application by following the instructions on the Website below.

<http://epson.sn>

Note:

For Windows, you can also use the software disc that came with the scanner.

Contacting Epson Support

Before Contacting Epson

If your Epson product is not operating properly and you cannot solve the problem using the troubleshooting information in your product manuals, contact Epson support services for assistance. If Epson support for your area is not listed below, contact the dealer where you purchased your product.

Epson support will be able to help you much more quickly if you give them the following information:

- Product serial number
(The serial number label is usually on the back of the product.)
- Product model
- Product software version
(Click **About**, **Version Info**, or a similar button in the product software.)
- Brand and model of your computer
- Your computer operating system name and version
- Names and versions of the software applications you normally use with your product

Note:

Depending on the product, the dial list data for fax and/or network settings may be stored in the product's memory. Due to breakdown or repair of a product, data and/or settings may be lost. Epson shall not be responsible for the loss of any data, for backing up or recovering data and/or settings even during a warranty period. We recommend that you make your own backup data or take notes.
